TOKAI Communications

More smiles for a better life

TOKAI GROUP

We value the connections with customers and partner companies, walk together, and rejoice together.

In today's rapidly developing of complex information and communication technology (ICT) such as the Internet, cloud computing, and artificial intelligence (AI), TOKAI Communications is on a mission to realize a prosperous life and society by working together with customers and partner companies to solve problems.

We place the success and joy of our customers as our top priority, and we always have a deep understanding of our customers' needs, and we combine our wisdom with our partners to propose the best solutions. In addition, TOKAI Communications makes full use of its proposals, technologies, and support capabilities to leverage its strengths of its high-quality telecommunications network to support the lives of individual customers in the information society, and to provide reliable and secure infrastructure related to the cloud, network, and systems that form the basis of the company's digital strategy for corporate customers. Furthermore, based on our growth strategy, we will promote capital investment, human resource development, and the creation of comfortable workplaces for the future, and build an even stronger corporate structure.

Going forward, we will continue to do our utmost to build a better future together while flexibly responding to the social changes brought about by the development of ICT in order to solve customer issues and realize a sustainable digital society.

Tsuyoshi Takahashi,
Managing and Representative Director

TOKAI Group

Corporate Philosophy

Beliefs of the TOKAI Group

To improve the lives of our customers, we will continue to grow and develop together with local communities and the earth.

Mission

The mission the TOKAI Group must complete to benefit society, our customers, and our shareholders

Transform, challenge, and implement.

Vision

Long-term business goals the TOKAI Group must aim for

Through continued expansion throughout Japan and the world, we will strive to be a one-stop provider of products and services requested by customers.

Corporate Value

Common values which must play an important role in guiding the actions of employees of the TOKAI group

Always sharing our joy and excitement with you.
Communication that links us all.
Giving you peace of mind, safety, and satisfaction.
Always remembering the enthusiasm and pride of professionalism.
Growing toward the future together with the communities we serve.

• B R A N D •

More smiles for a better life

Brand Slogan

Smiles makes people smile.
For a better life with smiles, we always smile.
TOKAI Group members decided to be smile for that.

Light that brightens the future, and synergy among TOKAI Group companies (overlapping beams of light)
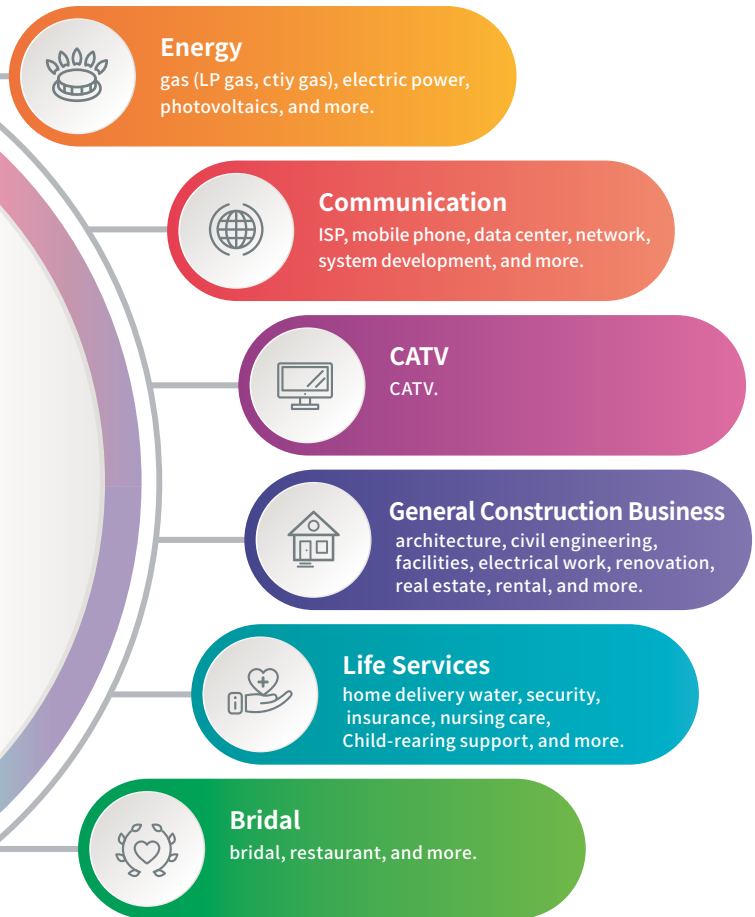

Corporate Mark

The rays of light shooting diagonally upward from the capital T is TOKAI Group's symbol. The upper-right portion of the logo represents the future, where the Group continually shines its light. Each Group company utilizes their unique strengths to realize our corporate philosophy, "continue to grow and develop together with local communities and the earth." An O shape can be seen between the T and the beams of light: this "TO" is short for TOKAI and also refers to the word "to" as in "to our customers," "to local communities," and "to the world." The logo is in Synergy Blue, our designated Group color that recalls blue skies, seas, and rivers. According to color psychology, this blue symbolizes the future, hope, and freedom, and thus expresses the TOKAI Group's desire to reach out and expand to the future and to the world.

TOKAI GROUP

TOKAI Group

Comprehensive and thorough support for more comfortable customer lifestyles

Since our founding in 1950, we have provided various lifestyle products and services.
It is precisely because we are a one-stop provider offering a wide range of products and services that we are able to generate so much synergy, and organically tie these products and services together to add integrated value.
By taking the user's viewpoint, we aim to provide various types of happiness including peace of mind, convenience, and comfort to each customer, and to spread this joy to as many customers as possible.

Provide thorough community-based lifestyle infrastructure services vital for daily life

Energy
gas (LP gas, ctiy gas), electric power, photovoltaics, and more.

Communication
ISP, mobile phone, data center, network, system development, and more.

CATV
CATV.

General Construction Business
architecture, civil engineering, facilities, electrical work, renovation, real estate, rental, and more.

Life Services
home delivery water, security, insurance, nursing care, Child-rearing support, and more.

Bridal
bridal, restaurant, and more.

TLC会員サービス
TLC Membership Service

In December 2012 we initiated our TLC Membership Service, a Group-wide membership system to foster integrated synergy throughout the Group, and the number of members exceeded 700,000.
The TLC Membership Service is a Group-wide membership system that allows customers to use the Group's lifestyle infrastructure service provisions-including gas, internet, CATV, Aqua (bottled water delivery)-and accumulate TLC points through everyday use.

Earn more points with multiple TOKAI Group service contracts!

TLC カサトク プラス TLC Kasatoku Plus

TLC Kasatoku Plus, launched in May 2017, rewards customers who currently use eligible services withadditional points for multiple contracts when they conclude another new contract for eligible services. And new customers who conclude two or more contracts for eligible services as well. This beneficial new system provides extra points for five years to customers who sign up for two or more TOKAI Group primary service contracts (LP gas, City gas, Aqua (bottled water delivery), Internet, CATV, Intelligent home, security and electric power). Furthermore, customers will also receive points upon registration or receipt of products/services when using our low-cost mobile phone (LIBMO), housing and/or renovation services. By providing one-stop, comprehensive Group infrastructure services for customer lifestyles through multi-contract combinations, we aim to offer more convenient and comfortable daily lives to our users.

New applications are no longer accepted as of March 20, 2023. (Benefits for current customers will end on March 31, 2028.) For more information, please click here. https://tlc.tokai.jp/tkplus/index.html

Points every month!

TOKAI Communications

As the company which handles the TOKAI Group's information communication business, TOKAI Communications offers diverse services that will be needed by advanced information communication services yet to appear.

Our mission is to continue to speed up communications to act as the infrastructure which is the foundation of the information society. We develop a broad range of services in the information communication field based on the "system integration business", "data center business", and "communications business", to realize solutions optimized for both our corporate and individual customers.

Three-in-one Integrated Solutions

System integration business

Data center business

Communication business

Corporate directed networks
Individual directed broadband

We provide one stop for versatile solutions that dramatically stimulate business.

System solution

Cloud integration	AWS and other clouds
Electronic data interchange	JFT
System cooperation	ASTERIA
Core corporate solution	ITARERI-TSUKUSERI "BUGYO for Cloud"
IoT and AI solution for equipment control	Smart Facility Manager
Wireless LAN Solution	Wireless LAN construction support

We resolve various challenges facing corporate systems to provide diverse systems solutions that support our customers' work. With technological capabilities based on wide-ranging system development experience, we provide total services ranging from consultation to construction, operation, and maintenance, helping our customers continue to expand their business.

Constantly grasps industry trends to accelerate business.

It is particularly important to respond promptly to change and to make decisions quickly in a violently changing corporate environment.

TOKAI Communications uses the optical fiber network and data center it owns, and the technologies and know-how it has developed over long years as a system integrator to offer broad-ranging information telecommunication services to its enterprise customers. By serving as a one stop supplier from upstream to downstream—everything from design to construction, operation, and support—it speeds up its customers' businesses.

SI (System Integration)・software development

- **System integration**
- **Cloud integration**
- **Network integration**
- **Software development**

We offer total integration that overcomes challenges by developing software matched to essential requirements of our customers work, speeding up networks, lowering costs, taking security measures, lightening operating loads, and so on. In response to the advance of the Cloud seen in recent years, we help our customers with consultation, design, construction, operation and all other steps necessary to introduce the Amazon Web Services (AWS) or other Cloud services.

IT operation management / BPO services "Smart Office Concierge"

We provide total 24/7 support for the management of IT related operations from PCs, tablets, smart phones and other of our clients' devices to IT services and various system support services they are now using.

We will enhance our data centers and cloud environment to develop seamless system services.

Providing 24/7 optimized out-sourcing services.

At TOKAI Communication's data centers, we operate and manage our customers' systems 24/7 by bringing together know-how we have developed as a system integrator. We not only take care of our customers machines, we offer various cloud services including mail systems and virtual servers, and outsourcing services optimized to match each customer's business plans.

We operate multiple data centers at remote locations.

We have data centers at remote sites in Shizuoka and Okayama which are linked by high volume high quality networks. The two data centers mutually backup and replicate their operations, supporting BCP and DR measures of our customers' systems.

● Okayama Data Center   ● Shizuoka Data Center

Outsourcing service

Data center service	BroadCenter
Data Center	Colocation service
Cloud platform	Cloud Platform
Private cloud	Pracla Hosted Private Cloud
ASP infrastructure for local governments	LGWAN hosting service
IT outsourcing service	OneOffice
Mail outsourcing	Mail Solution
Cloud file server	Cloud File Server
Backup	Backup Solution
Web security	Web Security
Secure browser	Safe Gate
Remote access	Smart Connect
Online storage	i-Disk

We use our own high quality data center and our own optical fiber network to provide Cloud services of all kinds at one stop: everything from basic infrastructure services such as virtual environment service to information system infrastructure services including mail systems or file servers which are indispensable to conduct business, Web security services that protect information assets from the threat of phishing etc., and data backup which is the first challenge with BCP.
By cooperating with other data center operators to boost the sustainability and availability of these Cloud services, we help our customers improve the sustainability of their businesses.

DATACENTER X ALLIANCE

Data center cross alliance (DCXA)

A strategic business alliance has been established by the operators of more than 20 data centers located in Japan. It is taking action to contribute to the simulation of regional industry and domestic data center operations by realizing BCP/DR services and performing testing to verify and market mutually complementary services and new virtual services.

A total of about 12,000 km of optical fiber cables are used to achieve a highly reliable network solution.

We support our customers businesses with high–quality telecommunications services.

We offer telecommunications service for carrier and enterprise "BroadLine" using TOKAI Group's optical fiber cables from the northern Kanto area to western Japan area. Since the Okayama Data Center began operating in April 2013, the optical fiber network has been expanded to cover areas between Osaka, Kagawa and Okayama. The western Japan region will also be covered as a new service area, to further expand services and improve quality.

● Okayama Data Center   ● Shizuoka Data Center
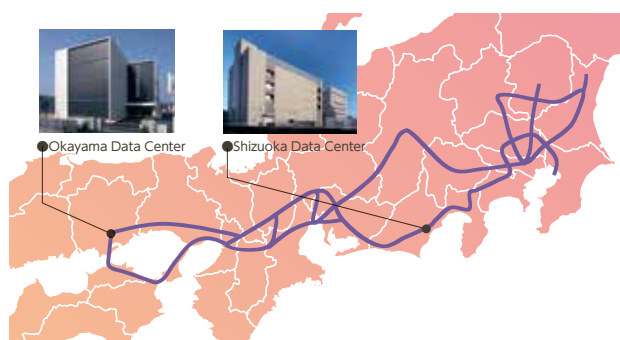

Telecommunications service for carrier and enterprise "BroadLine"

Optical fiber cables owned by TOKAI Communications are utilized to provide telecommunications service site to site, Internet connection services that include dedicated lines and wide-area Ethernet and connection service with major public clouds. These services are employed by a wide range of customers, from general companies in the manufacturing, logistics and services industries, as well as telecommunications providers, xSP and other service providers seeking to deliver high quality telecommunications.

Site-to-Site Connection service

Dedicated Ethernet line

Relation Ethernet (wide area Ethernet)

Dedicated optical fiber service

This service connects customer sites or data centers and other with a highly reliable network. We provide secure broadband network service at a reasonable price.

Internet service

Ethernet Internet

Data center connection Internet

Transit

With Japan's preeminent approximately 1,670 Gbps high volume backbone, it provides a stable Internet connection environment.

Solution service

Cloud connection solution

As a solution service, we provide a connection service with Amazon Web Services (AWS) and other Major Cloud services. The optimum network service is available to suit the customer's network environment, usage patterns and budget.

We support the creation of comfortable and enriching lifestyles through communication that connects people to people.

Broadband services

As an ISP (Internet Service Provider), we provide services under two brands: "@T COM" covering the whole country and "TNC," which operates in the Tokai area, mainly in Shizuoka Prefecture. Since 2015, we have received optical fiber wholesale from NTT and been providing our own fiber-optic line service.

We offer safe and comfortable communication services in addition to a full range of optional services.

Broadband Service Brand

@T COM   TNC

We will be an indispensable existence for customer's life.

Based on the strong belief that we are useful to our customers, we provide total communication services such as broadband service, MVNO service "LIBMO", and security service "TOKAI SAFE" that protects your smartphone and PC.

As a comprehensive telecommunications service company that provides broadband and mobile lines, we will work to expand and improve our services and strive to provide our customers with safety and security, convenience and comfort, and happiness.

Mobile services

In the mobile business, we operate SoftBank distributors, provide LIBMO, an MVNO service using DOCOMO's network, and provide smartphone repair services in partnership with iCracked*1.

In Shizuoka Prefecture, we have expanded our sales bases by developing collaboration shops that handle these services mainly in shopping malls. Also, in 2022, LIBMO became a DOCOMO Economy-MVNO, and has been handled at DOCOMO shops nationwide.

Combining face-to-face sales rooted in local communities and online sales, we will constantly strive to understand customer needs and improve and expand our services so that our mobile services can be used more comfortably, conveniently, and safely.

*1 iCracked is one of the world's largest smartphone repair providers, founded in 2010 in Silicon Valley California

As a corporate citizen
Initiatives by TOKAI Communications

Corporate governance

We build organizations and systems able to react promptly to changes of the business environment, at the same time as we aim to strengthen monitoring of management and internal controls, increase soundness and transparency of management through the Board of Directors, Board of Auditors and other internal company boards, to become a company that is open to society.

Compliance and rules of conduct

Aiming to become a company which is trusted by our customers and all of our other stakeholders, we have enacted the TOKAI Communications Rules of Conduct as a guideline to the conduct of our executive staff and employees including their compliance with the law, and we are undertaking sound business activities by complying with corporate ethics.

Information security and protection of personal information

We have obtained Information Security Management System certification under the international standard, ISO27001 and manage information security throughout our company. We also have formulated a "Privacy Policy" and related regulations, to thoroughly protect the personal information of our customers.

Quality control

We have obtained IT Service Management System certification under the international standard ISO20000, and strive to improve the quality of IT services. We will continue to provide high quality and safe products and services to our customers.

Achieving workplace environments where employees can work in comfort

We aim to provide better products and services and to achieve our goal of building sound working environments that will nurture personnel and technologies. We help boost the careers of employees and create workplace environments and living environments by recruiting internal personnel, offering in-house education and training courses, self-assessment system, support for child-rearing and nursing care, equipping dormitories and company housings, offering housing allowances, etc.

Support for human resources development

Wishing to give students who will bear the future practical abilities through real work experience in actual workplaces, and to nurture their entrepreneurial spirit so they can survive easily in the business world, we provide internships in both government service and group companies. We also aim to "nurture personnel resources who will contribute to the achievement of a rich information society and to the development or regional society".
